

Save Water, Save Energy, Enjoy the Comfort of Hot Water Recirculation

Innovation Leader in Hot Water Recirculation Technology

US DESIGN  US BUILT  PATENTED

Hot Water Recirculation Systems for the 152 million¹ households in the USA and Canada *For Retrofit & New Construction*

***How long do you
wait for hot
water?***

How Does It Work?

A pump at the tank or tankless heater, or under the sink with an Aquastat or by-pass valve, forces the lukewarm water from the hot supply line into the cold supply line back to the heater for reheating. In a dedicated return line, the pump is installed in the return line near the heater.

What our customers are saying...

Robert: *"Easy install. Works very well, and totally quiet"*

Gilde: *"Works great. Delivered on time. Easy to install. Hot water at my fingertips instantly!"*

Dan C: *"Easy Install. Kitchen sink was 2 minutes to feel any temp. change, now in 6 seconds to get hot water. Great product, have made recommended to co-workers"*

Jim G: *"I've had the recirculation system installed for a while and I have to tell you I am impressed with the performance. Ten seconds and I get hot water vs. 1.5 minutes prior."*

The Problem

How long do you wait for hot water when you turn on the faucet? 30 seconds, 1 minute, 2 or 3 minutes, longer? While you wait, a home with 5 taps can waste up to 15,000 gallons of tempered water down the drain.

The homeowner pays for the wasted water, energy and utility fees.

The Solution

Install a proven, patented and awarded AquaMotion recirculation system. AquaMotion offer kits for every possible installation for hot water tanks, indoor or outdoor tankless, and combi-boilers.

The Benefits

- Hot Water Comfort at Every Faucet/Shower
- Save Time, Never Wait For Hot Water
- Save Water, 12,000 – 15,000 Gallons per Year
- Save Energy with ON/OFF Timers & Controls
- Save on Utility Fees
- Meet all Local Plumbing Codes
- **GO GREEN**, Help Conserve this Precious Water Resource

The Cost

Annual cost to run a circulator for 5 hours per day at \$0.16² per kW is estimated at \$4.00², \$8.00² for 3 speed circulators.

The payback is on average 1 to 3 years.

HOT WATER TANK SYSTEMS

Standard plumbing, single pipe system

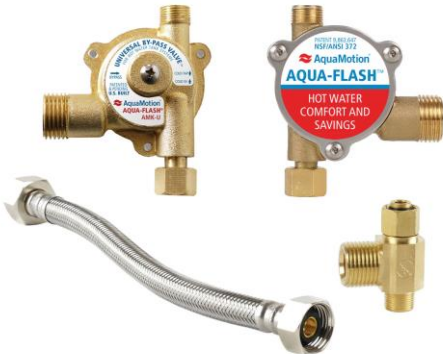

PATENTED

AQUA-FLASH® AMH1K-3UV

Select this if no electrical outlet under sink.

- By-pass valve kit installs under sink in 10 minutes
- Pump with built-in or plug-in timer installs on top of water heater
- Kit includes: stainless union pump, built-in or plug-in timer, 6.5 ft. line cord, brass/stainless Aqua-Flash® by-pass valve, brass fittings, and stainless hose

AQUA-FLASH® AMK-UK

Universal Valve Kit for tank systems

- Under sink bypass valve kits for additional locations, up to 5 per pump.
- Flash valve installs on cold angle stop.
- Replaces Grundfos plastic Comfort Valve 59526, Watts 367010, Taco Hotlink HLV-1
- Kit Includes: brass/stainless Aqua-Flash® bypass valve, check valve, brass fittings, and stainless hose

AMH3K-7 / AMH3K-7N (N = No Timer)

Select this if electrical outlet under sink.

- GFCI outlet required under sink.
- Installs in 15 minutes
- Kit includes: stainless union pump with mounting bracket, 6.5 ft. line cord, built-in or plug-in timer, aquastat, check valve, and stainless hoses

FOR HOMES WITH DEDICATED RETURN LINE

A **dedicated return line** is a pipe installed from the last fixture back to the water heater.

AMH2K-7 / AMH2K-7N (N = No Timer)

For systems with standard Tank Heaters.

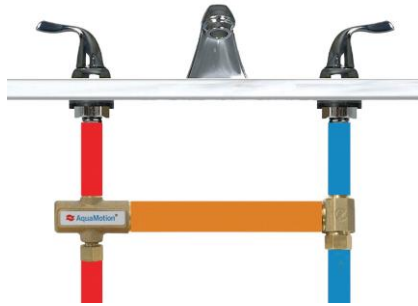

- Installs in return line near the tank heater.
- Kit includes: stainless union pump, 6.5 ft. line cord, built-in or plug-in timer, aquastat, brass fittings, and check valves

TANKLESS WATER HEATER SYSTEMS

Standard plumbing, single pipe system

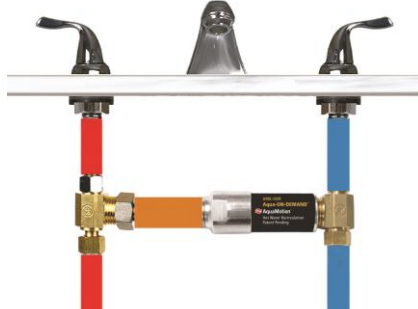

PATENTED

AMH1K-6ODRZT1

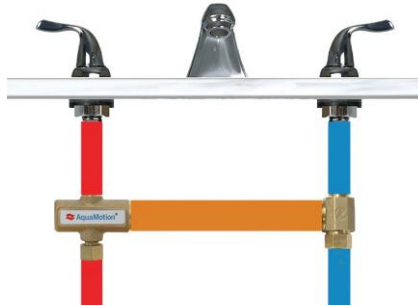

Select if no electrical outlet under sink.

- By-pass valve installs under sink in 10 minutes
- ODR2 valve installs on hot angle stop
- Pump with built-in or plug-in timer installs at or near tankless heater
- Kit Includes: stainless union pump with built-in or plug-in timer, check valve, brass bypass system, 6.5 ft. line cord, brass fittings, stainless hoses. and AMK-ODR2 brass valve

AMK-ODR Stainless Valve Kit

- Under sink bypass valve kit for additional locations, up to 5 per pump.
- ODR valve installs on cold angle stop
- Kit includes: stainless bypass valve, brass fitting, and stainless hose

AMK-ODR2 Brass Valve Kit

- Under sink bypass valve kit for additional locations, up to 5 per pump.
- ODR2 valve install on hot angle stop
- Kit includes: brass bypass valve, brass fitting, and stainless hose

AQUA ON-DEMAND™

AMH1K-7ODRN

Includes AMK-WB ON-DEMAND™ Kit

- By-pass valve installs under sink in 10 minutes
- Pump without timer installs at or near tankless heater
- Kit Includes: stainless union pump, check valve, brass bypass system, 6.5 ft. line cord, brass fittings, stainless hoses. and AMK-ODR2 brass valve

AQUA-ON-DEMAND™

AMH1K-RODRN

Includes AMK-WB ON-DEMAND™ Kit

- By-pass valve installs under sink in 10 minutes
- Pump without timer installs at or near tankless heater
- Kit Includes: stainless 3-speed flanged pump, 6.5 ft. line cord, check valves, 3/4" NPT stainless flanges with gaskets and fasteners, fitting, hose, AMK-ODR2 brass bypass valve, ON DEMAND™ Wall Button with receiver

TANKLESS WATER HEATER SYSTEMS

Standard plumbing, single pipe system

PATENTED

AMH3K-R

Select this if electrical outlet under sink.

- GFCI outlet required under sink.
- Kit includes: stainless 3-speed flanged pump with mounting bracket, plug-in timer, 6.5 ft. line cord, check valves, aquastat, 3/4" NPT stainless flanges with gaskets and fasteners, fittings, and hoses

FOR HOMES WITH DEDICATED RETURN LINE

A **dedicated return line** is a pipe installed from the last fixture back to the water heater.

AMH2K-R / AMH2K-RN (N = No Timer)

For systems with standard Tankless Heaters

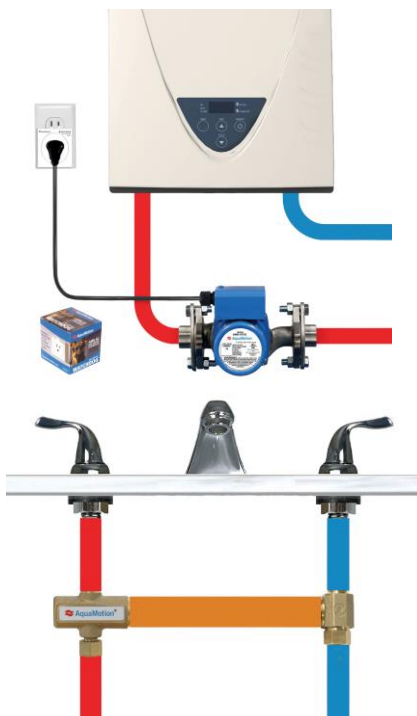

- Installs in return line near the tankless heater
- Kit Includes: stainless 3-speed flanged pump, aquastat, built-in or plug-in timer, 6.5 ft. line cord, 3/4" NPT flanges with gaskets and fasteners

COMBI-BOILER SYSTEMS

Standard plumbing, single pipe system

PATENTED

AquaMotion has solved the problem of Hot Water Recirculation with Combi-Boilers

COMBI-GUARD™ AMH1K-RODRNCG

Includes AMK-SC Watchdog Smart WIFI Controller

- Controlled per the AquaMotion Comfort Control™ App (Mobile device required)
- Delivers enhanced comfort, greater energy savings while maintaining the ideal balance between hot water and space heating
- Kit Includes: stainless 3-speed flanged pump, 6.5 ft. line cord, check valve, 3/4" NPT stainless flanges with gaskets and fasteners, fitting, hose, ODR2 brass bypass valve, AquaMotion Watchdog Smart WIFI Controller™

Free download for iOS and Android devices

AQUA-SHIELD™ OUTDOOR TANKLESS SYSTEMS

Standard plumbing, single pipe system

PATENTED

“THE ONLY OUTDOOR RECIRCULATION CIRCULATOR!”

FEATURES

- Outdoor enclosure with clear cover for timer visibility
- Anti-tampering locking device
- Rain, sprinkler and insect resistant
- Built-in timer, 24 hour, 15 minute interval tabs.
- Freeze protected with power on, **except ON DEMAND™**

OUTDOOR INSTALLED AMH1K-7ODRXZT1

AMK-ODR2 Brass by-pass valve installs under sink in 10 minutes

AMH1K-7ODRXZT1

- Pump installs at or near tankless heater
- Up to 250 ft. of total pipe length
- Kit Includes: stainless union pump with built-in timer, check valve, brass bypass system, 6.5 ft. line cord, brass fittings, stainless hoses. and AMK-ODR2 brass valve

AQUA-ON-DEMAND™ AMH1K-7ODRXT1

Includes AMK-WB ON-DEMAND™ Kit

- Pump installs at or near tankless heater
- Up to 250 ft. of total pipe length
- Kit Includes: stainless union pump, 6.5 ft. line cord, check valve, brass fitting, stainless hose, AMK-ODR2 brass valve, and ON DEMAND™ wall button with receiver

AQUA-ON-DEMAND™ AMH1K-RODRXT1

Includes AMK-WB ON-DEMAND™ Kit

- Pump installs at or near tankless heater
- Up to 600 ft. of total pipe length
- Kit Includes: stainless 3-speed flanged pump, 6.5 ft. line cord, check valve, 3/4" NPT stainless flanges with gaskets and fasteners, brass fitting, stainless hose, AMK-ODR2 brass bypass valve, and ON DEMAND™ wall button with

FOR HOMES WITH DEDICATED RETURN LINE

AMH2K-7X

- Installs in return line near the tankless heater
- On/Off operating range 115-125°F [46.1-51.7°C]
- Up to 250 ft. of total pipe length
- Kit Includes: stainless union pump, 6.5 ft. line cord, 3/4" NPT brass union tailpieces with gaskets

AMH2K-RX

- Installs in return line near the tankless heater
- On/Off operating range 115-125°F [46.1-51.7°C]
- Up to 600 ft. of total pipe length
- Kit Includes: stainless 3-speed flanged pump, 6.5 ft. line cord, 3/4" NPT stainless flanges with gaskets and fasteners

AQUAMOTION CONTROL SYSTEMS

Fully automatic systems with, sensors, switches, and timers

AQUAMOTION WATCHDOG SMART WIFI CONTROLLER™

AMK-SC SMART CONTROLLER

- Requires a mobile device and WI-FI signal
- For indoor use only
- Programmable timer setting and On-Demand
- AquaMotion Comfort Control™ App available for free download

TIMERS

AMK-T15 Mechanical Timer

Plugs into wall outlet

- 24 Hours, 15 minute increments
- Two outlets – one on each side
- Timer ON/OFF switch

AMK-T Digital Timer

Plugs into wall outlet

- 7-day programmable function
- Power Failure Protection – Settings stay even after power outage or when unplugged

Mechanical Timer

For Indoor Kits

- Built into pumps
- 24 Hours, 15 minute increments
- Timer ON/OFF switch

AQUA-SHIELD™ TIMER

For Outdoor Kits

- Built into pumps
- 24 Hours, 15 minute increments
- Timer ON/OFF/AUTO switch

AQUA ON-DEMAND™

AMK-WB Wireless Button

- Does not require a timer
- Provides wireless control by the push of a button
- Kit includes: wireless button with mounting bracket, and RF receiver

AMK-WS Wall Switch

- Does not require a timer
- Provides wireless control by a wall mounting switch
- Kit includes: wireless wall switch, and RF receiver

AMK-MS Motion Sensor

- Does not require a timer
- Provides wireless control by a sensor that detects movement
- Kit includes: wireless sensor with mounting bracket, and RF receiver

AMK-CB Counter Button

- Does not require a timer
- Provides control by an air actuated button mounted at sink
- Kit includes: counter button with fastener, air actuated relay, and air tubing

Add up to 5 additional buttons, sensors, or switches per receiver

- AMK-WBR: Wireless button
- AMK-MSR: Motion Sensor
- AMK-WSR: Wireless switch
